

SPEAKER · VASCULAR ACCESS EDUCATOR

Dr. Jack LeDonne

MD, VA-BC · Medical Director, Chesapeake Vascular Access

Real procedures. Real teaching. Fewer complications.

ABOUT

Dr. Jack LeDonne is a surgeon and vascular access educator. He is Medical Director of Chesapeake Vascular Access, a past president of the Association for Vascular Access, and a 2018 recipient of its Suzanne Herbst Award for Excellence in Vascular Access.

He teaches clinical teams to place and maintain vascular access devices with fewer complications, using real procedure video from a career at the bedside.

TALKS AND TRAINING

Central venous access: IJV and axillary approaches
Ultrasound-guided insertion, step by step, including the infraclavicular axillary "royal route"

Securement, dressings and preventing MARSI
Sutureless securement, dressing changes and avoiding skin injury

Infection prevention in catheter placement
Technique choices that lower catheter-related infection risk

When things go wrong
Recognizing and managing complications during central venous access

Are there two standards?
Physician and vascular access specialist practice: closing the gap
